**FOR IMMEDIATE RELEASE**

**PRO TECH TARGETS DISTRIBUTORS FOR NOISEBUSTER® EARMUFF AT  
INTERNATIONAL LAWN, GARDEN & POWER EQUIPMENT EXPO**

FORT PIERCE, Fla., October 12, 2005 – Pro Tech Communications, Inc. (OTCBB:PCTU) will showcase the NoiseBuster® Electronic Noise Canceling Earmuff at the International Lawn Garden and Power Equipment Expo, October 14-16, in Louisville, Kentucky, at booth #1261 (indoors) and #6224 (outdoors). The product electronically cancels the low frequency noise emitted by power equipment. Detailed product information is available at [www.noisebuster.net](http://www.noisebuster.net).

Unlike traditional passive-only earmuffs and earplugs, the NoiseBuster Electronic Noise Canceling Safety Earmuff provides greater protection from a wider range of noise frequencies, particularly the low frequency noise generated by engines, motors and fans. The passive component of the NoiseBuster Electronic Noise Canceling Earmuff has a Noise Reduction Rating (NRR) of 26dB. Electronic noise cancellation provides as much as 20dB of added noise reduction within the low-frequency bandwidth of 20-800 Hz.

“The NoiseBuster Electronic Noise Canceling Safety Earmuff delivers protection in the low frequencies, where passive ear defenders cannot, and users of lawn mowers, leaf blowers and other power equipment will really appreciate the difference,” said Richard Hennessey, President, Pro Tech. “Additionally, at \$149, our price point is a true breakthrough. This professional grade product is half the price of some noise canceling consumer audio headphones currently on the market, and a fraction of the cost of similar technology used in aviation that can be as high as \$1,200.”

Mr. Hennessey continued, “Lawn and garden equipment users will also enjoy the NoiseBuster’s audio input feature, enabling them to listen to music at safe volume levels while working. We look forward to introducing the product to a market that can benefit from it in so many ways.”

**About Pro Tech Communications, Inc.**

Pro Tech Communications, Inc. engineers, designs and distributes audio and communications solutions and other products for business users, industrial users and consumers. The company's mission is to utilize its patented technologies to deliver the most advanced, feature-rich, durable and comfortable products at the most competitive price. Pro Tech's most recognized brands include the Apollo™ line of high-performance products for office and call center environments, the ProCom™ line of highly-durable headsets for drive-through restaurant personnel and the NoiseBuster® electronic noise canceling consumer audio headphone and safety earmuff.
