FOR IMMEDIATE RELEASE

**PRO TECH COMMUNICATIONS OFFERS MILITARY DISCOUNT ON
NOISEBUSTER® NOISE CANCELING HEADPHONE**

FORT PIERCE, Fla.-- Feb. 17, 2005--Pro Tech Communications, Inc. (OTCBB:PCTU) today initiated a military discount on its NoiseBuster(R) headphone through the end of 2005. NoiseBuster electronically reduces irritating, anxiety-provoking background noise by coupling low-frequency noise waves with their exact mirror image waves. Ideal for use on airplanes or in any setting where engine and motor noise are predominant, NoiseBuster can be used on its own for simple peace and quiet or in conjunction with a portable audio device for excellent music clarity without overamplification and distortion.

The product retails for \$69 and members of the United States Armed Forces and their families can purchase the product for \$59 on ProTech's website, by email or by phone. To purchase online, go to www.protechcommunications.com and click on the American flag (use promotion code USA2005). For more information or to place an off line order, email USA2005@noisebuster.net or call 772-873-4286.

"We deeply appreciate the commitment of the men and women of the United States military and their families and we are pleased to offer them this discount," said Richard Hennessey, president, Pro Tech. "We hope that the NoiseBuster will promote relaxation during this difficult time."

NoiseBuster contains patented ANR technology that makes it the highest performing and most stable ANR headphone on the market. The NoiseBuster delivers 18dB of active noise reduction across a wider frequency range than any competitive consumer audio headphone available on the market today. NoiseBuster is one of the best-known and most highly-respected brands in the ANR headphone category having received over the years prestigious recognition and numerous awards from organizations such as Discover Magazine and the Electronic Industries Association.

There are a variety of noise canceling headphones on the market priced as high as \$299. The NoiseBuster delivers more active noise cancellation performance than the highest priced competing headphone for a list price of only \$69.

The open-back design of the NoiseBuster is comfortable for the wearer and the headband folds for portability. The earcups achieve a good ear seal without enclosing the ear in unwieldy, and often hot, closed earcups. Included with the headphone is a dual-pronged plug for airline use, a AAA battery and a carry bag.

PRO TECH OFFERS MILITARY DISCOUNT ON NOISEBUSTER HEADPHONES - p.2

According to Richard Hennessey, the product is unmatched by the competition. "There is no other ANR headphone on the market today that can deliver the level of active noise reduction performance that is offered by the NoiseBuster. Consumers may think they've seen this type of product before but in this case hearing--not seeing--is believing. And when you consider our very reasonable price point, the product is simply a tremendous value."

Qualified members of the press can receive free evaluation units by contacting Joanna Lipper at 203-226-4447 ext. 3506 or jlipper@nctgroupinc.com.

About Pro Tech Communications, Inc.

Founded in 1994, Pro Tech Communications, Inc. engineers, designs, and distributes audio and communications solutions and other products for business users, industrial users, and consumers. The company's mission is to utilize its patented technologies to deliver the most advanced, feature-rich, durable and comfortable products at the highest value. Pro Tech's most recognized brands include the Apollo line of high-performance products for office and call center environments; the ProCom line of highly-durable headsets for drive-through restaurant personnel; and the NoiseBuster noise canceling headphone for consumer audio and in-flight entertainment.

Under an exclusive licensing arrangement with a world-leader in the field, the company has access to a significant portfolio of patented technologies relating to electronic noise reduction and improved speech intelligibility. Utilizing these proven technologies, Pro Tech plans to introduce a variety of innovative, leading-edge products that further enhance personal communications, comfort and safety.
